

Group Work Outline

Central Epidemiology Unit
(23.12.2019-24.12.2019)

Objectives of Workshop

- (1) To discuss about the priority climate change related communicable diseases
- (2) To review the current surveillance system for climate change related diseases
- (3) To discuss for developing the SoPs and Guideline of these diseases

(1) Group Work on the priority climate change related communicable diseases

(1) Common climate change related diseases in your local area based on your local situation

- Name of diseases
- Frequency of disease burden
- Trend of diseases
- Distribution of diseases
- Affected population

(2) Experienced/notified/aware any outbreak/epidemic of communicable diseases due to climate change in your region

- Experienced/notified/aware of communicable diseases after changing climate conditions— Yes/No
- If yes, mention experiences/notified/aware of disease outbreak/epidemic after changing climate conditions

(3) Experiences of any disaster and its health impacts due to climate change in your region

- Experiences of any disaster in your region
- Effects of disaster especially focus on communicable diseases

(2) Group Work for prioritizing the climate change related diseases

(1) Prioritize the climate change related diseases according to vulnerability assessment

– Prioritize the climate change related diseases from the results of Group work (1)

_ According to **vulnerability** ,

No.	Variables	Vulnerability			
		0	1	2	3
1.	Frequency of Disease burden				
2.	Affected population				
3.	Affected areas				
4.	Climate related exposures				

	Variables	Vulnerability			
		0	1	2	3
5.	Climate Policies and programmes				
6.	Public health programmes				
7.	Curative care				
8.	Stakeholders' process				

(3) Group Work on current surveillance system for climate change related diseases

(1) In-cooperation of climate change related diseases to existing surveillance system

- The ways to in-cooperate climate sensitive diseases to existing surveillance system
- Consideration about EWARS

(2) Suggestions to improve/ strengthen the integrated surveillance system to be sensitive to mainly focus on climate change related diseases

- Suggestions

(4) Group work for developing SoPs and Guidelines for climate change related diseases

- (1) Prioritization of climate change related diseases to be developed new or update SoPs and Guidelines
- (2) Suggestions to update or develop SoPs and guidelines of climate change related diseases

Thank You
